

Your Complete Power Solution

■ DIESEL & GAS STANDBY GENERATORS

■ MOBILE GENERATORS

■ TELECOMMUNICATIONS GENERATORS

■ AGRICULTURAL GENERATORS

■ CUSTOM GENERATORS

■ INTERMODAL POWER PACKS

In the early 1980's, Taylor Machine Works, Inc.® created **Taylor Power Systems**® to distribute Industrial engines and manufacture generator sets. With a history dating back over 80 years, Taylor Machine Works - which manufactures heavy machinery for industries worldwide - has maintained a reputation of having unparalleled product quality...with service to match... Taylor Power Systems is no different!

Taylor Power Systems brings generations of unmatched excellence and durability to the power generator industry. Since its foundation, Taylor Power Systems has manufactured generator sets for a wide variety of applications - from office buildings and nursing homes to sewage treatment plants - from telecommunications to agricultural industries. In the early 1990's, Taylor Power Systems became a driving force in the prime power and intermodal generator set industry. Today, thousands of Taylor Power Systems units are operating in some of the most hostile environments on Earth:

- In blazing 140°F heat in Death Valley.
 - In freezing -40°F and 70 mph winds in driving snow storms.
 - Fastened under 18-wheelers being mercilessly jarred by every pothole on the highway, even through punishing rains and damaging salt spray.
- Most generator set manufacturers would call this customer abuse. At Taylor Power Systems, we call it the real world, And we design every unit to survive, even thrive, in it.

Taylor Power Systems... Your 21st Century Power Source!
