

LP/NATURAL GAS GENERATORS

Taylor Power Systems® is the name you can rely on for alternative fuel powered generators.

TAYLOR

POWER SYSTEMS

Taylor Power Systems has expanded its LP/Natural Gas product line adding TG200 thru TG400 in a partnership with NG Engines. NG Engines is the leader in alternate fueled, EPA emission certified engines. We recently completed construction of a TG325 and TG400 unit, the largest LP/Natural Gas Units ever produced at Taylor Power Systems.

Taylor Power Systems offers a full line of LP/Natural Gas models with a variety of accessories. The usage of Natural Gas engines is a voluntary take on the initiative regarding the protection of the earth's environment and the enhancement of alternative energy utilization.

MODEL	ENGINE	GENERATOR
TG200	NGE D111TIC InLine 6	Stamford UC1274J
TG250	NGE D146L V8	Stamford HCI434E
TG350	NGE D183TIC V10	Stamford HCI434F
TG400	NGE D219TIC V12	Stamford HCI534C

STANDARD FEATURES:

- Heavy duty steel base
- Vibration Isolators
- Oil drain valve with extension
- Battery rack
- Battery cables
- Water jacket heater
- Owners manual
- Control Panel - options available

Accessories:

- Exhaust silencers
- Weather enclosures
- Sound attenuated enclosures
- Flexible fuel lines
- Battery
- Battery chargers
- Main line circuit breaker
- DGC2020 control panel
- Remote annunciator for DGC2020 control panel
- Analog auto-start control panel
