**The model pictured is shown with optional equipment.*

When telecommunications companies need a dependable backup power supply to keep their networks connected, they call on **Taylor Power Systems**. Our line of standard and custom-designed generators for the telecommunications industry features a flexible design that can meet any power requirement. All of our generators are manufactured with the same high quality and durability that have made us the industry leader.

SINGLE-SIDE SERVICE TELECOMMUNICATION GENERATORS

Taylor Power Systems is your partner in business with custom **TAYLORED** products to answer your need for a power solution in small space applications like the Single Side Service Generator designed to maximizing work space and efficiency.

Answering Your Power Generation Needs

When telecommunication companies need a dependable source of emergency power to keep their networks communicating, they rely on Taylor Power Systems® for all their crucial power generation needs. With both our standard and custom tailored products, you can be assured we will meet even the most difficult of site power applications. As one of the industries leader for over 30 years we have experience hearing our customer needs and delivering products that are surpassed by no other.

Taylor Power Systems® provides some of the world's largest companies with power generation solutions for all applications. Our **standard** telecom products are manufactured as one of the quietest, smallest, and most reliable in the industry. Some design features include: sound attenuation, galvanized steel housings, rodent protection, removable doors to eliminate door swing issues, integral muffler design, remote communication capabilities, wind rated enclosures, service ball valves with extensions, interior service lights, and much more.

Our customers have come to rely on Taylor Power Systems® to manufacture durable products in the most extreme conditions imaginable. As your partner in business we have designed our **custom** product solutions to answer the need for a power product in small space applications. Taylor Telecom Products are manufactured as one of the quietest, smallest, and most reliable in the industry.

Innovative in design Taylor Power Systems® can offer a variety of solutions to your power generation needs. When your customers are your liability, count on Taylor Power Systems® to help **"HARDEN YOUR NETWORK"**.
