From hatch to harvest, Taylor Power Systems® is the name you can rely on for emergency power when you need it.

Models ranging from 55kW through 250kW

In today's agricultural market, farmers have to know that their standby generator will carry the load when its called upon. Some may take this for granted, but not at **Taylor Power Systems®**.

Taylor Power Systems is the one name to rely on for emergency power when you need it.

Taylor, a name synonymous with dependability, brings you a full line of American-made generators made to fit the needs of the agricultural industry.

Taylor Power Systems generator sets are the premiere agricultural generator in the industry.

STANDARD FEATURES:

- Heavy-duty industrial diesel engine
- Brushless rotating field generator with class "H" insulation rated, single phase 120/240 volt standby duty, PMG standard on units rated 80kW and larger except for the TA125
- Analog Control Panel displaying AC voltage, AC frequency, Percent of Load, Hour Meter and a toggle switch that switches generator from "Off" to "Manual" to "Auto" positions
- Separate Oil Pressure and Water Temperature Gauges
- "Manual" key override and bypass switch that allows you to start the generator set manually in the event of a control system failure
- Engine block heater
- Heavy-duty steel base with integral vibration isolators
- Oil and Coolant filled
- Load bank tested
- Engine mounted spark arrestor muffler
- Flexible fuel lines
- Battery rack and cables
- Battery charger

Analog Control Panel
