# YOUR COMPLETE GENERATOR SOLUTION

DESIGNED | ENGINEERED | MANUFACTURED  
CLINTON, MISSISSIPPI

## History of Taylor Power Systems

Taylor Power Systems, Inc., located in Clinton, Mississippi, has served its clients by providing a variety of reliable power generating resources. Taylor Power is a part of The Taylor Group of Companies and was established by W.A. Taylor Jr. in 1986 to distribute industrial engines and manufacture generator sets. Taylor Machine Works has been designing and building high-quality industrial lift equipment for more than 90 years. Taylor Power Systems provides that same quality and integrity, designing and building dependable prime and standby power generation resources in various challenging and critical environments.

## Headquarters

Taylor Power Systems' main office and production facilities in Clinton, Mississippi, includes more than 37,600 square feet of office, training, and engineering space and 300,000 square feet of manufacturing and warehouse space, giving Taylor Power the technological resources to produce the finest electrical power generating resources for a variety of different needs.

## Meeting the Needs of Our Customers

Taylor Power Systems offers a full line of diesel standby generator sets ranging from 8kW to 2000kW and natural gas/LP generators from 25kW to 800kW sold direct in nine southeastern states and nationwide through our dealer network. Taylor Power generator sets are certified to UL2200 Standards. Taylor Power offers open units, weather enclosed, and sound attenuated models with various optional equipment and features. Control units with analog or digital configurations are rugged and built for dependable, extended service. The availability of many optional features permits Taylor Power to tailor its units to meet the many unique needs of individual customers.

## Markets We Serve

In its over 30 year history, Taylor Power Systems has established a solid reputation for quality, innovation, and service. Taylor Power products meet critical needs for prime and standby power in many environments, such as agriculture, commercial buildings, residences, education, government, healthcare, oil and gas, over-the-road trucks, barges, ports, refrigerated containers on ships, rail transportation, telecommunications sites, and water systems.

## Taking Care of Our Customers is Priority One

The Taylor name is legendary for exceptional customer service and after-sale support. This reputation carries over in the service Taylor Power Systems provides to its diversified customer population. The commitment to outstanding customer service can be found from the initial contact between a potential customer and the delivery of the final product. Taylor Power can also provide continual preventive maintenance, parts, and service for its products through Taylor Sudden Service's 26 factory direct store locations. Taylor Sudden Service is the parts, service, repair, and rental provider for all Taylor Power Systems Generators.

The Taylor name is identified with the development and delivery of equipment built to the highest standards meeting each customer's unique needs. Taylor does not adhere to a "one-size-fits-all" philosophy. This is also true for Taylor Power Systems, which honors the commitment to **FAITH VISION WORK** established by The Taylor Group of Companies.
