Taylor Power Systems, Inc. Welcomes Pioneer Critical Power to Dealer Network

CLINTON, Miss., August 7, 2017 -- Taylor Power Systems, Inc. a manufacturer of diesel, natural gas & LP generators for standby, prime, mobile, and agricultural applications, announced today Pioneer Power Solutions, Inc. (Nasdaq: PPSI) (“Pioneer Critical Power”) is now part of their dealer network. Taylor offers a complete line of engine generators, ranging from 9 kW to 2,000 kW of output, designed for a broad spectrum of market segments. Pioneer Critical Power will be representing the Taylor line of generators in eight different states.

Nathan Mazurek, Pioneer's Chairman and Chief Executive Officer, said, “Working with a leading generator manufacturer such as Taylor Power will enable us to provide top-of-the-line generators to expand our addressable market significantly and more directly address opportunities to grow our higher-margin service business.”

Taylor Power diesel generator sets range from 9 kW to 2,000 kW, feature low operating costs, and provide convenient, reliable, and EPA compliant power for a variety of standby and prime power applications. All units utilize state-of-the-art engine and AC alternators to exceed any application, with a standard two-year warranty. Taylor combines common controller platforms for ease of use for any application needs. The natural gas generator sets range from 25 kW to 450 kW and deliver clean, best-in-class power for standby or prime applications. Both product lines are designed and manufactured to operate in a multitude of environments and meet the most current EPA standards to provide users an efficient and innovative power solution.

Craft Tyler, Taylor Power Systems Inc. General Sales Manager, said, “We are excited to have Pioneer Critical Power as a signed dealer and confident they will perform to the next level with the amount of experience and knowledge the Pioneer Critical Power team offers.

About Taylor Power Systems

Taylor Power Systems Inc. is a premier, made in USA generator manufacturer, with a name synonymous with dependability. Taylor designs, engineers, manufactures, and services generators for the oil & gas, industrial, commercial, health care, telecommunications, municipal, and agricultural standby or prime power markets. For over 31 years Taylor Power Systems has established a solid reputation for quality, innovation & service. Taylor’s quality control process includes an exhaustive testing procedure to ensure that their generators exceed customers’ expectations. For backup emergency power or planned power projects, their simple, user friendly systems make Taylor Power Systems the right choice for your complete generator solution.

About Pioneer Power Solutions, Inc.

Pioneer Power Solutions, Inc. manufactures, sells, and services a broad range of specialty electrical transmission, distribution and on-site power generation equipment for applications in the utility, industrial, commercial and backup power markets. The Company's principal products and services include custom-engineered electrical transformers, low and medium voltage switchgear and engine-generator sets and controls, complemented by a national field-service organization to maintain and repair power generation assets. Pioneer is headquartered in Fort Lee, New Jersey and operates from 12 additional locations in the U.S., Canada and Mexico for manufacturing, centralized distribution, engineering, sales, service and administration.
